CONTENTS OF VOLUME 35

NUMBER 1, JANUARY 1976

ALAN B. PRITCHARD, PATRICIA A. HOLMES, AND JOHN C. KIRSCHMAN. The Fate of FD&C Red No. 2 and Its Metabolite, Naphthionic Acid, after Different Routes of Administration in the Rat 1

MINORU KASUYA. Effect of Selenium on the Toxicity of Methylmercury on Nervous Tissue in Culture 11

DAVID L. CONINE, MOONAHM YUM, ROBERT C. MARTZ, GEORGE K. STOOKEY, AND ROBERT B. FORNEY. Toxicity of Sodium Pentafluorostannite, A New Anticariogenic Agent. III. 30-Day Toxicity Study in Rats 21

RICHARD E. PETERSON AND JAMES M. FUJIMOTO. Increased "Bile Duct-Pancreatic Fluid" Flow in Rats Pretreated with Carbon Tetrachloride 29

MOLLY S. HARMS, RICHARD E. PETERSON, JAMES M. FUJIMOTO, AND CHESLEY P. ERWIN. Increased "Bile Duct-Pancreatic Fluid" Flow in Chlorinated Hydrocarbon-Treated Rats 41

MICHAEL A. GALLO, ELISABETH BACHMANN, AND LEON GOLBERG. Mitochondrial Effects of 2,6-Dichloro-4-Nitroaniline and Its Metabolites 51

WILLEM SEINEN AND MARIANNE I. WILLEMS. Toxicity of Organotin Compounds. I. Atrophy of Thymus and Thymus-Dependent Lymphoid Tissue in Rats Fed Di-*n*-Octyltindichloride 63

KRYSTYNA TEICHERT, TERESA SZYMCZYK, SILVANA CONSOLO, AND HERBERT LADINSKY. Effect of Acute and Chronic Treatment with Dichlorvos on Rat Brain Cholinergic Parameters 77

ROBERT D. SHORT, JR., JOHN Q. RUSSEL, JAN L. MINOR, AND CHENG-CHUN LEE. Developmental Toxicity of Ferric Dimethyldithiocarbamate and Bis(Dimethylthiocarbamoyl) Disulfide in Rats and Mice 83

ROBERT M. JOY. Convulsive Properties of Chlorinated Hydrocarbon Insecticides in the Cat Central Nervous System 95

ROBERT R. ROSATO, EDWARD L. STEPHEN, AND WALLACE L. PANNIER. Dose–Response Data for Toxiferine Dichloride in Monkeys and Guinea Pigs 107

BRIAN G. LAKE, RONALD C. LONGLAND, SHARAT D. GANGOLLI, AND ALUN G. LLOYD. The Influence of Some Foreign Compounds on Hepatic Xenobiotic Metabolism and The Urinary Excretion of D-Glucuronic Acid Metabolites in the Rat 113

EUGENE J. ZAWOISKI. Prevention of Caffeine-Induced Cleft Palate by L-Glutamic Acid 123

J. A. MARSHMAN, M. P. RAMSAY, AND E. M. SELLERS. Quantitation of Phencyclidine in Biological Fluids and Application to Human Overdose 129

G. L. KENNEDY, JR., I. A. DRESSLER, W. R. RICHTER, M. L. KEPLINGER, AND J. C. CALANDRA. Effects of Hexachlorophene in the Rat and Their Reversibility 137

J. U. BELL AND G. R. VAN PETTEN. Characterization of Maternal and Fetal Ovine Plasma Cholinesterase 147

J. T. Veal and G. E. Dagle. Evaluation of Beeswax–Tricaprylin Vehicle for Pulmonary Carcinogenesis Studies 157

J. U. Bell, M. M. Hansell, and D. J. Ecobichon. The Influence of DDT on the Ontogenesis of Drug-Metabolizing Enzymes in the Perinatal Rat 165

SHORT COMMUNICATIONS

DJ. Sadeghi, M. R. Zarrindast and F. A. Ghaffarpur. Prevention of Promethazine-Induced Gastric Ulcers in Guinea Pigs with Disodium Cromoglycate 179

Ming Shing Juang. Depression of Frog Muscle Contraction by Methylmercuric Chloride and Mercuric Chloride 183

AWARDS PRESENTATIONS 187

ANNOUNCEMENT 197

NUMBER 2, FEBRUARY 1976

Review Article. T. Colin Campbell and Johnnie R. Hayes. The Role of Aflatoxin Metabolism in Its Toxic Lesion 199

Michael J. Gentle. The Effects of Gold Thioglucose on the Central Nervous System of Chicks (*Gallus domesticus*) 223

C. E. Mendoza. Toxicity and Effects of Malathion on Esterases of Suckling Albino Rats 229

K. Diane Courtney, M. F. Copeland, and A. Robbins. The Effects of Pentachloronitrobenzene, Hexachlorobenzene, and Related Compounds on Fetal Development 239

F. M. Loew, C. E. Doige, J. G. Manns, G. P. Searcy, J. M. Bell, and J. D. Jones. Evaluation of Dietary Rapeseed Protein Concentrate Flours in Rats and Dogs 257

OUR CATS ARE PECIAL

Your research project is special, too. To get it off to the right start, start it with cats. They're clean, space and food thrifty, and well suited to biomedical research.

Next, choose Liberty cats. Bred and raised in our licensed, closed colony behind specially-developed pathogen barriers. Genetically uniform, vigorous, docile, friendly. Free from internal and external parasites. Your choice of age and gender. Each examined by a staff veterinarian and shipped with its health certificate.

We would like to discuss your research needs with you. Call collect (201) 647-6212. Or write us at P.O. Box 1, Liberty Corner, New Jersey 07938.

Liberty Laboratories. Genetically refined/Health defined cats.

When you call or write, ask for our 14-page booklet: *The Minimal Disease Cat.* Valuable, up-to-date facts about cats as laboratory animals.

LIBERTY LABORATORIES

P.O. Box 1, Liberty Corner, New Jersey 07938

Laboratory Primate Handbook

By ROBERT A. WHITNEY, Jr.
National Institutes of Health, Bethesda, Maryland

DONALD J. JOHNSON
Brooke Army Medical Center, Fort Sam Houston, Texas

WILLIAM C. COLE
U.S. Naval Medical Research Unit No. 2, Taipei, Taiwan

FROM THE REVIEWS:

"This handbook contains much practical information and should provide a valuable source of current information for those unfamiliar with nonhuman primates in the laboratory setting."
—LABORATORY ANIMAL SCIENCE

". . . it is effective in communicating in a clear, concise manner those areas of primate care which are of particular concern."
—LAB ANIMAL

This handbook provides the information essential for successfully maintaining nonhuman primates in a laboratory environment. Because most nonhuman primates used in research are of feral origin and can contract many diseases that are communicable to man, the book emphasizes the protection of animal and human health through correct housing, handling, and husbandry procedures. It treats not only the well-known infections and parasites to which nonhuman primates are subject, but also several recently recognized diseases that can be transmitted to humans. In addition the book:

- Compiles and explains the latest federal regulations and policies relating to nonhuman primates;
- Updates and clarifies the confusing nomenclature for primates found in the biomedical literature;
- Provides information on identification, procurement, nutrition, and physiology – much of it previously widely dispersed throughout the literature;
- Includes an extensive bibliography and suggested titles for establishing a reference library.

The book will be invaluable as a central reference source to medical researchers, biologists, veterinarians, animal care specialists, and others who use nonhuman primates in their research, or maintain colonies for other purposes.

1973, 176 pp., $9.50/£4.40

Essays in Toxicology

Edited by WAYLAND J. HAYES, JR.

Center in Toxicology
Department of Biochemistry
School of Medicine
Vanderbilt University
Nashville, Tennessee

REVIEWS OF PREVIOUS VOLUMES:
"The volume performs an important function by presenting information on specific topics in a broad and interesting manner.
—AMERICAN SCIENTIST

". . . a book to be read with pleasure, interest and profit."
—ANNALS OF CLINICAL BIOCHEMISTRY

Essays in Toxicology will prove useful to the student wishing to gain a clearer understanding concerning the various aspects of toxicology, and to the instructor who, while not an expert in the field, desires to include this material in lectures. The essays also will aid research workers wanting an up-to-date picture of developments not directly within their own specialty.

VOLUME 5

CONTENTS:
JOHN M. BARNES, Nitrosamines
ROBERT L. METCALF, A Laboratory Model Ecosystem to Evaluate Compounds Producing Biological Magnification
DONALD P. MORGAN and C. C. ROAN, The Metabolism of DDT in Man
EDWARD J. SCHANTZ and HIROSHI SUGIYAMA, The Toxins of *Clostridium botulinum*
RICHARD D. STEWART, The Use of Breath Analysis in Clinical Toxicology
T. R. TEPHLY, W. D. WATKINS, and J. I. GOODMAN, The Biochemical Toxicology of Methanol
Author Index—Subject Index.

1973, 208 pp., $17.50/£8.25
